The Directors of the Association for the Exhibition of the andustry of all Not one site of the Exhibition will be quest on the 18th day of July.

It making this arthogramment for Directors swall themselves of the copy turks to state that the Exhibition which they have present, with they have exceed, and the Exhibition which they have proposed, will, they believe, fully meet the just expectations of the Public.

It is proved that should be harmon that, in order to affard angle scope for the investive takent and allifet our Countrymenin machinery and agricultural implements, we have increased the size of the Saild is by adding nearly one-feurith to its area, beyond what was ariginally contemplated, to that we have now for the purposes of Exhibition, two hundred thousand square left, or nearly five acres.

Not limiting their plans to a display merely curious or attractive, the Directors have organized a Department of Mineralogy and Geology in which some of the best scentific takent of the country has been empiryed, and the forestedam is thus laid of a most valuable national collection of the mineral resources of the Country.

The Directors had hoped to open the Exhibition at an earlier period, but the investive and intrinsacy of the atwice of construction and the high standard of architectoral beauty, which it has been the object of the Association to attain have produced delay, and it has been impractively for the proposition of the Procedus, notwithstanding their atmost vaginace, and their most across desire, to announce the opening at an earlier sensitive and existing collection of the vortices of the Exhibition, the result provides to be most gravitying and not survoyenly of the conditione mainfense taward it by the Government of the United States, a condition of his durity that has every pictors made in this country, and will tend to increase the active emiliation of the again country, and will tend to increase the active emiliation of this eccurity.
